

PSYCHOMETRIC TEST

The importance of choosing the right career path cannot be over emphasised as that is what leads to sustained happiness. It is important that you have the abilities for a chosen career but more importantly you should be equipped to be able to sustain your passion for it.

Psychometric test for students is a tool which enables us to chart your Nature and Intelligence and form a personality matrix to indicate the careers which are best suited for you and in which you can achieve sustained success and satisfaction.

Having been tested and validated on over several thousands of students, psychometric test for students has been found to give an accurate result based on the 76 questions asked which on an average, students take about 30 minutes to complete.

The best psychometric test online measures much more than self-perception. What people do, think, experience or say is relative and therefore not accurate. Psychometric tests assess you based on your actual behaviour. In order to exactly gauge your behaviour, strengths, weaknesses and abilities, this test compares your behaviour with others.

Psychometric test for students assesses whether you are motivated by competition, have the ability to deal with deadlines without stress and are an extrovert as compared to other students. In order to give you the ability to perform well and succeed in your career path and consequently the stream of education you choose, psychometric tests help you identify issues and difficulties and work out strategies to overcome them.

How GSC can help

We help you plan your career by working on your overall abilities, aptitude and personality. Psychometric tests identify areas you need to work on. Based on these indications, our consultants give you the right advice and guidance.

These proven tests are unbiased and therefore highly reliable. Working with The GSC, you can benefit from a multidimensional personality assessment. Our professional consultants will also use the test results to assess differential abilities, such as numerical, verbal, spatial, mechanical, reasoning, clerical, closure and psycho-motor abilities.

We conduct this test for students under 18 years of age and for adults. Our consultants offer customised career pathway planning based on your identified strengths and weaknesses. These strictly timed tests offer accurate valuation of different abilities. Designed in the multiple choice format, psychometric tests designed at The Chopras are considered to be the best.
